

UN1893A

Zipper Pre-expansion Machine

Suitable for all kinds garment's zipper pre-expansion

Product features

- Specialized for zipper pre-expansion processing to improve garment manufacturing efficiency.
- Equipped with a durable metal pulley (standard) and optional remote data collection system for monitoring.
- Ensures stable and uniform zipper expansion ratio, reducing defective rates.
- Greatly improves expansion and pulling effect with stable performance and high quality.
- Efficiency increased by up to 110%, reducing average time per piece from 17s to 6–9s.
- Suitable for all kinds of clothing zipper pre-expansion, especially for jackets, hoodies, sportswear, and other garments requiring high-quality zipper processing.

Technical parameter

Model	UN1893A
Power	4.8KW
Voltage:	220V 50–60Hz
G/N weight	155/105kgs
Dimensions:	1300×630×980 mm
Packing size:	1375×710×1258 mm, 1.23 CBM
